

Coding & Solution

Date	11 July 2026
Team ID	
Project Name	EduGenie – Google Gemini Powered Learning Assistant
Maximum Marks	5 Marks

Solution Summary

Field	Details
Repository Link / URL	https://github.com/Adithya18042006/EduGenie-Google-Gemini-Powered-Learning-Assistant
Programming Language(s)	Python
Framework(s) Used	FastAPI (backend), HTML + CSS (frontend)
Key Features Implemented	● Intelligent Question Answering ● Simplified Concept Explanations ● AI-Powered Quiz Generation ● Educational Text Summarization ● Personalized Learning Path Recommendations ● Interactive and User-Friendly Interface ● Google Gemini API Integration
Pending / Incomplete Features	● Quiz Score & Result Tracking dashboard (in progress)
Setup / Run Instructions	1. Clone the repository: <code>git clone <repository-link></code> 2. Create and activate a virtual environment (Python 3.10+). 3. Install dependencies: <code>pip install -r requirements.txt</code> 4. Set the <code>GOOGLE_GEMINI_API_KEY</code> environment variable with a valid API key. 5. Run the FastAPI server: <code>uvicorn main:app --reload</code> 6. Open the application in a browser at <code>http://localhost:8000</code>

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes

S.No	Criteria	Status (Yes / No)
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments

The backend (FastAPI) and frontend (HTML/CSS) are structured into clearly separated modules for each AI feature (Q&A, explanation, quiz, summarization, learning path), with a shared Gemini API client and prompt-template utility for consistency and easy maintenance.
