

Project Executable Files

Date	11July2026
Team ID	
Project Name	EduGenie – Google Gemini Powered Learning Assistant
Maximum Marks	3 Marks

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	Yes
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	No
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	No
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	No

Step2:File / FolderStructure

Overview of the project's file and folder structure:

/EduGenie-root	
/app	
main.py	-FastAPI application entry point & route registration
/routes	
qa.py	-Question Answering endpoint
concept.py	-Concept Explanation endpoint
quiz.py	-Quiz Generation endpoint
summarize.py	-Text Summarization endpoint
learning_path.py	-Personalized Learning Path endpoint
/services	
gemini_client.py	-Google Gemini API client wrapper
prompt_templates.py	-Prompt engineering utilities
/models	
schemas.py	-Pydantic request/response models

/db	
database.py	-Database connection/session setup
models.py	-SQLAlchemy models (quiz results, learning history)
/templates	-HTML (Jinja2) templates
/static	
/css	- Stylesheets
/js	-Frontend JavaScript
.env.example	-Sample environment variables
.gitignore	
requirements.txt	-Python dependencies
README.md	-Setup and run instructions

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://edugenie-google-gemini-powered-learning.onrender.com
Login Credentials (Demo)	No demo account provided — evaluator can self-register via the Sign Up page
Platform / Hosting Provider	“Render
Repository Link	https://github.com/Adithya18042006/EduGenie-Google-Gemini-Powered-Learning-Assistant
Demo Video Link	https://drive.google.com/file/d/1dbCgZ3NerTsfzRtB4jprFifVcv9lxApA/view?usp=sharing

Step 4: Run Instructions

Step-by-step instructions for the evaluator to run the project locally:

Pre-requisites: Python 3.10+, pip, Git, and a valid Google Gemini API key.

Step 1: Clone the repository: `git clone <repository-link>`

Step 2: Create and activate a virtual environment: `python -m venv venv`

Step 3: Install dependencies: `pip install -r requirements.txt`

Step 4: Copy .env.example to .env and add your key: `GOOGLE_GEMINI_API_KEY=your_api_key_here`

Step 5: Start the application: `uvicorn app.main:app --reload`

Step 6: Open a browser and navigate to: `http://localhost:8000`

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Quiz Score & Result Tracking dashboard is still in progress.	Manual result review for now; full dashboard planned for the next release.
2	Response time depends partly on the external Google Gemini API's latency.	Added request timeouts and response caching for repeated/common queries.
3	No user authentication / login system implemented yet.	Not required for core MVP functionality; planned as a future enhancement.
